[illegible]

The screenshot displays the 'InvenPlant - SWI Notepad' application window. The interface is divided into three main sections:

- Menu Bar:** Includes File, Edit, View, Insert, Tools, and Help.
- Structure Panel (Left):** A hierarchical tree view of plant components. A cursor points to the 'chillers' folder, which is labeled with the number '190'. The tree includes folders like 'chiller', 'water', 'inlet', 'outlet', 'setpoint', 'refrigerant', and 'pressure', each containing various parameters such as 'id', 'description', 'manufacturer', 'modelnumber', 'type', 'retype', 'fuelsource', 'bestrejection', 'COP', 'capacity', 'powerdraw', 'image', 'actual', 'flowrate', 'temperature', and 'pointname'.
- Values Panel (Right):** A table-like structure with two columns: 'Chiller4' and 'chir3'. It lists specific equipment types: 'Centrifugal', 'REBA', and 'electric'. Below this are several empty rows for additional data entry.

At the bottom of the window, there is a status bar with the text 'For Help, press F1' and a taskbar showing other open applications like 'Start', 'Internet Explorer', 'Microsoft Word', and 'InvenPlant - SWI...'.
